

XGEN COATING SYSTEM™

**Solutions. Delivered.**

## APPLICATION CASE STUDY:

*Project Description:* Apply Product to Brick Pavers at Hospital  
*Customer:* University of Louisville Hospital  
 (A Crothall EVS Managed Hospital)  
*Location:* Louisville, Kentucky  
*Date:* September, 2016

### PROJECT DETAILS

**Project Overview:** The University of Louisville Hospital has indoor brick pavers in a hallway that leads to the parking garage/outside. The pavers picked up asphalt and other debris from foot traffic coming into the hallway. The hospital couldn't keep the pavers clean and the gray grout was grossly stained beyond cleaning. The Customer wanted to improve the appearance and cleanliness of the brick pavers.

**xGen Product Purchased Through:** PPG Louisville  
**Customer Contact:** Christy Washington (Crothall)

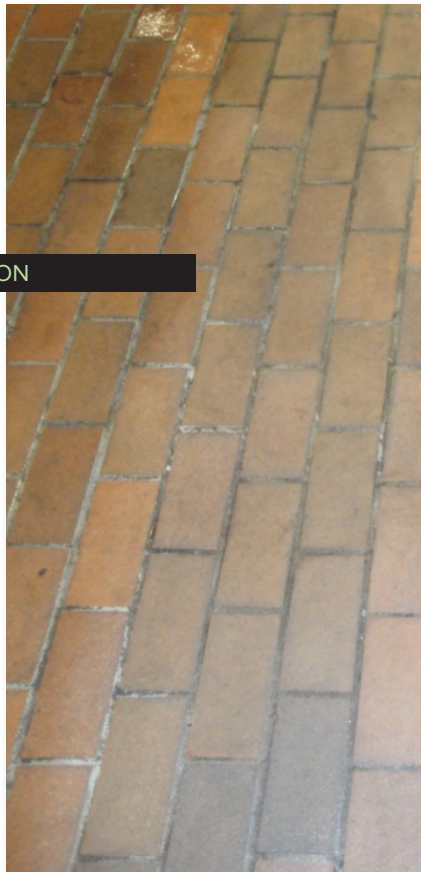

### PRODUCT DETAILS

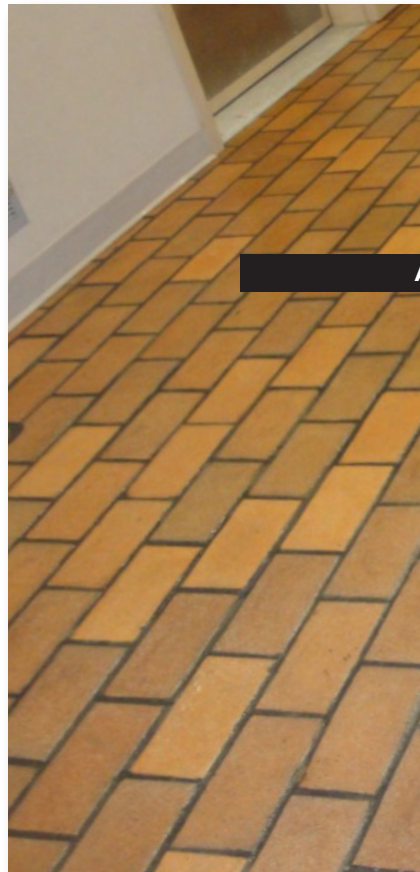

**xGen Product Utilized:** X-PROTECT Performance Topcoat - High Gloss

**Features & Benefits:** The brick pavers were stripped, cleaned and the grout was re-colored. X-PROTECT was then applied. The brick pavers in this hallway were not very porous, which allowed the gloss coating to work well and provide the look requested by the Customer. The grout and pavers are now sealed with X-PROTECT and are much easier to clean with non-harsh chemical cleaners. This application coating will last 3-5 years and provide a level of slip resistance in the hallway as well.
