

XGEN COATING SYSTEM™

Solutions. Delivered.

APPLICATION CASE STUDY:

Project Description: Apply Product to Residential Slate Floor (In Mudroom)

Customer: Residential/Homeowner

Location: Louisville, Kentucky

Date: October, 2015

PROJECT DETAILS

Project Overview: Client has consistently struggled to keep the slate floor from appearing dirty. Over time, cleaning with heavy chemicals caused the slate to lose its color and luster. The client sought a long-term solution that would restore the vibrant colors of the flooring and provide an easier means to clean and maintain against daily traffic.

xGen Product Purchased Through: PPG Louisville / **Chris Carnes**, Louisville Sales Representative

Customer Contact: **Ann Arentsen**, Homeowner

PRODUCT DETAILS

xGen Product Utilized: **X-PROTECT Performance Topcoat - High Gloss**

Features & Benefits: By applying the X-PROTECT Performance Topcoat, the homeowner was able to eliminate the use of toxic chemicals that continued to attack the slate, degrading its color and luster. xGen Coatings restored the slate to "like-new" condition, bringing back its color and shine. The Client was especially pleased with the fact that the floor can now be cleaned with hot water and safe cleaners. The floor is more slip resistant and the luster/shine of the slate will be maintained for at least 3-5 years.
