

XGEN COATING SYSTEM™

X-RESTORE®
OXIDIZED METAL
CLEAR

- Leading-edge protection for all decorative non-ferrous metals, including aluminum, copper, brass, bronze, nickel, galvanized surfaces, oxidized painted surfaces and stainless steel.
- Provides a “one-and-done” coating that will prevent metals from corrosion, tarnishing and staining.
- Materials that have been coated will be easy to clean, and will prevent finger prints, streaking from harsh chemicals and allow materials to be cleaned with neutral cleaners.

PRIMARY BENEFITS

- Enhances the shine of old worn metals to like-new
- Provides corrosion protection (ASTM B117 – 4,000+ hours tested)
- Resistant to salt-spray and harsh chemicals
- UV stable and non-yellowing
- Withstand over 2,000 Degrees
- Applied at 0.1-0.3 mil DFT – EPA Compliant
- Glass-like surface repels moisture, oil and dirt
